

ANURIMA SARKAR

Full Stack Web Developer | AI/ML Enthusiast

anutri2k05@gmail.com | Kolkata, India

github.com/Anurima2206 | linkedin.com/in/anurima-sarkar-bb7682337 | portfolio-website.vercel.app

Profile

B.Tech CSE (IoT) student skilled in **full stack web development**, with experience building responsive web applications using HTML, CSS, JavaScript, and React.js, along with scalable backend systems using Node.js and Express.js. Developing practical skills in **AI/ML** through Python and Scikit-learn, including data preprocessing, model training, feature engineering, and model evaluation. Also experienced in API integration, MySQL, MongoDB, and IoT sensor integration.

Education

Techno Main Salt Lake	Kolkata, India
<i>Bachelor of Technology in CSE (IoT)</i>	2023 – 2027
South Point High School	Kolkata, India
<i>AISSCE (Class XII)</i>	2023
South Point High School	Kolkata, India
<i>AISSE (Class X)</i>	2021

Projects

AI Mock Interview Platform | *React.js, Node.js, Express.js, MongoDB, Gemini API, JWT*

- Built an **AI-powered full-stack mock interview platform** generating **personalized interview questions** using **Gemini API** based on job role, difficulty, and user skills.
- Implemented **JWT authentication**, interview history, AI-based answer evaluation, **voice/text responses**, and a fully responsive **React dashboard**.
- GitHub:** github.com/Anurima2206/AI-Mock-Interview

Skin Disease Prediction Website | *HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, JWT*

- Developed a **full-stack AI-powered web application** integrated with a Deep Learning model achieving **~85% prediction accuracy** for skin disease detection.
- Implemented **secure image upload**, AI prediction reports in **downloadable PDF format**, prediction history, and dermatologist recommendations within a **5 Km radius**.
- GitHub:** github.com/Anurima2206/DermAI-Skin-Disease-Prediction-Website

Student Dropout Prediction System | *Python, Scikit-learn*

- Contributed to the **machine learning component** of a group project by building **Logistic Regression and Random Forest** models to predict student dropout from **35 features**, achieving about **78% accuracy**.
- Performed **data preprocessing, feature engineering, and hyperparameter tuning**, and developed a regression model for academic performance prediction with an **MSE of approximately 26**.
- GitHub:** github.com/byteforge101/sih

Technical Skills

Programming Languages: Java, JavaScript, Python

Web Development & Databases: HTML, CSS, Tailwind CSS, React.js, Node.js, Express.js, REST API, MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman

Machine Learning: NumPy, Pandas, Scikit-learn, Data Preprocessing, Feature Engineering, Model Training, Model Evaluation

AI & Generative AI: Prompt Engineering with LLMs, LLM API Integration

IoT Basics: Basic IoT Concepts & Sensor Integration

Achievements

- Certificate of Merit & Silver Medal – Secured **2nd Highest YGPA in Department (2024–25)**.

Certifications

- Data Structures & Algorithms** –
